

Dancing In The Street

Stephen Day

It was coming down in sheets
You were staring back at me in the middle of the street that night
It was dark but I could see it
In the morning I would see you in a different light

I knew better
I saw your feet off the ground
I knew better
Something was holding me down
I knew better
And still I spun you around

And for a moment we
We were dancing in the street like people do
Dancing in the street, hiding the truth
Dancing in the street like people do
When they're in love

Ooh-ooh-ooh
There in the street light we both knew

It was coming down in sheets
You were staring back at me like you didn't want to leave that night
Holding tight 'cause you could feel it
In the morning I would see you in a different light

You knew better
And still you kept me around
You knew better
Something was holding me down
You knew better
And still I spun you around

And for a moment we
We were dancing in the street like people do
Dancing in the street hiding the truth
Dancing in the street like people do
When they're in love

Ooh-ooh-ooh
There in the street light we both knew
There in the street light we both knew

Suddenly, morning came
And all the rain had gone away
When we woke up from a dream
Darling, everything had changed
Though it's over and we know it
Would you know that I care?
Would you know that I care?

We were dancing in the street like people do
Dancing in the street hiding the truth
Dancing in the street like people do
When they're in love

Ooh-ooh-ooh

There in the street light we both knew
