

# Something Special

Stephen Duffy

I'll never be hip in the magazines  
(That don't matter)  
And I don't mix in those social scenes  
(Just don't bother)  
I'm not in the book on the coffee tables  
(I don't care)  
And I just don't fit designer labels  
We're out there  
We've just got each other  
One love and one lover  
This must be the start of something special

Taken to the heart as something special  
When we're apart we're together  
Welcome to the start of forever  
It's such a release just to be with you  
(We're together)  
Even when I can't speak my love talks to you  
(You're my lover)  
You don't tie me down, you just set me free  
(Easter, brother)  
I don't want more than you to be with me  
(Undercover)  
I can't express it better  
Mere words lack the lustre
