Let's Do It All

Steppenwolf

You know what I want and I know what you like We know when it feels good We know when it feels right Just like it did last night I got you on my mind, can't seem to really get much done Why don't you come right here, or I'll come over there You know we'd have some fun We got spontaneous combustion We got what everybody dreams about at night Come on let's do it all tonight

I'm in your private dreams, you're in the public eye You know that I pass out each time that you pass by Could make a grown man cry For I just can't forget, we got that absolutely perfect fit Now that I've stooped to that and it has come to this Let's just get on with it We have that mutual attraction We got what makes the whole world want to fuss and fight Come on and let's do it all tonight
