Come and Dance with Me

Ain't my fault if the rhythm took me by surprise
And it's no big deal you turned up looking so good tonight
And now I can't stop, I can't move away
How's the same old song making my heart race
Let those rumours fly, we'll go down together in disgrace

Come on, come on, come on, come on

'Cause there's something in the way your body moves
Got me hypnotised, my hands all over you
We can't deny this crazy chemistry
Come and dance with me
Come and dance with me
Those feet ain't guilty, they know what to do
Don't care if it's over when the night is through
'Cause even if it's just a fantasy

Come and dance with me
Come and dance with me
Come on, come on, come on
Come and dance with me

If you kissed me now feel like I'd already know the taste
If we walked right out maybe you'd already know the way
Oh, I can't believe how we synchronise
Like you know my secrets, you read my mind
Is it hot in here 'cause you're doing all the things I like

Come on, come on, come on, come on

'Cause there's something in the way your body moves
Got me hypnotised, my hands all over you
We can't deny this crazy chemistry
Come and dance with me
Come and dance with me
Those feet ain't guilty, they know what to do
Don't care if it's over when the night is through
'Cause even if it's just a fantasy

Come and dance with me
Come and dance with me
And, baby, even if it's just a fantasy
Dance with me
Those feet ain't guilty, they know they should
Dance with me
Those hands should really hold onto me
Dance with me
Show me that you care
Come on, come on, come on, come on
Come and dance with me, yeah

Come on
(Dance with me)

Come and dance with me
Come and dance with me
Come on, come on, come on

Dance

'Cause there's something in the way your body moves
Got me hypnotised, my hands all over you
We can't deny this crazy chemistry
Come and dance with me
Come and dance with me
Those feet ain't guilty, they know what to do
Don't care if it's over when the night is through
'Cause even if it's just a fantasy

Come and dance with me

'Cause there's something in the way your body moves
Got me hypnotised, my hands all over you
We can't deny this crazy chemistry
