

To the One

Steps

Forever seems like long ago
All we used to know
We've left it behind
It's when I put that record on
When I hear our song
And suddenly I'm in a feeling
I'm right by your side but you're not with me

To the one I love
Close but not enough
Went different ways
We'll always be what could've been
Remember when we had it all
Just before the fall
Maybe you're somewhere right now
Thinking of me

So cruel how nothing stays the same
You know how it plays
When something ends
You're no stranger in my memory
Pictures of you and me and how we were then
Where are you now?
Would we still make sense?
Will time have changed you?

To the one I love
Close but not enough
Went different ways
We'll always be what could've been
Remember when we had it all
Just before the fall
Maybe you're somewhere right now
Thinking of me

To the one I love
Little things take me back to another life
Where we make it together just one more time
(One, to the one, one, to the one)

To the one I love
Close but not enough
Went different ways
We'll always be what could've been
Remember when we had it all
Just before the fall
Maybe you're somewhere right now
Thinking of me
To the one that I love
To the one, to the one that I love
