Pain

Stereomud

With every form you come
you surprise me
hypnotize me
with every breath i take
you're depriving
suffocating...choking

Now the time has come
when i tell myself
there's nothing more i can take
then you show me

Will it matter right now?
if i'm already numb
that's what you do to control me...
to control me

So much sadness from me
that's the way i feel
all the madness from me
that's what makes you real
i don't want your
pain pain pain pain

With every cut you make
you expose me
cause you know me
with every bottle drank
you can drown me
cause you found me...out

Now the time has come
when i tell myself
there's nothing more i can take
then you show me...

Will it matter right now?
if i'm already numb
that's what you do to control me...
to control me

So much sadness from me
that's the way i feel
all the madness from me
that's what makes you real
i don't want your

Pain pain pain

With every form you take
with every cut you make

So much

Pain pain pain pain

So much sadness from me

thats the way i feel
all the madness from me
thats what makes you real
i dont want your

Pain pain pain

So much sadness
