

# Leave The Light On

Stereophonics

Leave the light on for me  
I'll take the train home  
Then we can talk it over  
Maybe fix it like we did before

I'm not easy to be  
With or without me, I see  
There's always something to feel  
In my body and my soul

I don't know where you are  
Or where you're going tonight  
Come on, help me through tonight  
Come on, let me feel alright  
Come on, let your love light shine on me

Come on, let the stars align  
Come on, help me feel alive  
Come on now, shine your light on me  
On me  
On me

You're always up, I'm deep  
Down in the ocean, mining fears  
Swim to the surface and breathe  
From shadows I will grow

I wanna fill my cup and turn this ship around  
Sail back to the beach  
Time to run towards the fears  
Time to take these views in front of me

No more running 'round and 'round  
Time to get my feet on the ground  
Come on now, shine your light on me  
On me

No more running 'round and 'round  
Time to get my feet on the ground  
Come on now, shine your light on me

Come on let the stars align  
Come on, help me feel alive  
Come on now, shine your light on me  
On me  
Yeah  
Shine your light on me  
Yeah  
Shine your light on me

On me  
On me
