Pick a Part That's New

Stereophonics

I've never been here before Didn't know where to go Never met you before

I've never been to your home That smells not unknown Foot steps made of stone Walking feels familiar

You can do all the things that you like to do All around underground pick a part that's new You can do all the things that you like to do All around upside down pick a part that's new

People drinking on their own Push buttons on the phone Was I here once before?

Is that my voice on the phone
That last drink on my own
Did I ever leave at all
Confusion's familiar

(3x):

You can do all the things that you like to do All around underground pick a part that's new You can do all the things that you like to do All around upside down pick a part that's new

So what's new to you? What's new to you? What's new to you?
