

When You See It

Stereophonics

Blue skies today
Planes fly above my head
Wish I was on one now just to get to you
Life takes time
I'm gonna lie beneath the stars
And dream of being with you once again

It seems everything
Just takes so long
Just to get to where we all belong, yeah

I saw the sea today
I took a swim and washed away
The troubles in my mind
Watched them float away
Street beggar man
Give him all my pocket change
So he could get along just another day
And everybody's road is long, just keep on walking on and on

'Cause when you see it
You will feel it
And when you feel it
You will mean it
And when you mean it
You believe it
When you believe it
You'll be free, yeah

Sparks fly again
I got a man with a drunken mind
Thinking he can take me out and shoot in my head
I just walked away
I doubt the fire's in my head
Gonna be the better man, fight another day

It's up to you what you wanna do
But everything comes back to you

So when you see it
You will feel it
And when you feel it
You will mean it
And when you mean it
You believe it
When you believe it
You'll be free, yeah

I don't mind falling down
I pick myself up from the ground
Learn to give myself another break
Time will tell what you're gonna be
It's only life, so just be free

So when you see it
You will feel it
And when you feel it

You will mean it
And when you mean it
You believe it
When you believe it
You'll be free, yeah

It seems everything takes so long
Just to get to where we all belong, yeah
And everybody's road is long
Just keep on walking on and on, yeah

Blue skies today
Planes fly across my sky
Wish I was on one now just to get to you
