

Close to You

Steve Aoki

You're the center of the universe
And if you were the Sun then I'd be Jupiter
I spin around you, I spin around you
I shoot for the moon to land amongst the stars
I was aiming for you, but all I got was scars
I spin around you, I spin around you

No matter how I move, my waves don't get to you
No matter what I say, don't even notice me
No matter what I do, I can't get close to you
I can't get close to you

I say your name out loud
My arms wide open now
I keep on spinning round
I can't get close to you
Will you come tumbling down
I stretch my fingers out
We're almost touching now
I can't get close to you

I can't get close
I can't get close to you
I can't get close to you
I can't get close to you

I can't get close to you
I can't get close to you

No matter how I move, my waves don't get to you
No matter what I say, don't even notice me
No matter what I do, I can't get close to you
I can't get close to you

I say your name out loud
My arms wide open now
I keep on spinning round
I can't get close to you
Will you come tumbling down
I stretch my fingers out
We're almost touching now
I can't get close to you

I can't get close to you
I can't get close to you

I can't get close to you
I can't get close to you
