Dim the lights
So you cant see me
Close your mouth
Don't speak
Just feel me

Closer we become
Together we will fall
Than we're one
This night
This night
We give ourselves one night

The mood is set The food is eatin' The time is right For love It's beating A little bit of talk A little bit of pleasure A little bit of makin out And than we work it out A little somokey-smoke Tell me a dirty joke Up on your roof On your roof And we don't need nobody To have a little party Its just two Just us two And we don't need nobody Cuz we go ladi dadi Just us two Me and you Me and you

Feel the kiss
And smile so softly
We're just friends
But I like you slightly
We wont cross the line
We'll go on proper
Takes some time

Just a boy and a girl Just us two In a world

Take a walk with me
And we'll go dancing in the rain
And baby we'll run under a tree
Ill look at you
You'll look at me
