

# Slow Down

Steve Moakler

Ever since I turned eighteen  
I've been running away from home  
Only staying anywhere long enough  
For 'Hello, goodbye, I'm gone'  
Met you dancing one October night  
She said I haven't got you off my mind  
Some people just feel like home I guess  
I can't tell you why

I've counted every highway line  
I've heard every billboard sign  
I swear I've been everywhere  
But I'm looking for a place that's mine  
It's hard to put your boots in the ground  
For guys like me running town to town  
Somebody like you makes me want to  
Slow down, down, down

Maybe hang a front porch swing  
On a lazy little afternoon  
Settle down in one place  
For more than a day or two  
Wanna give the times a little break from spinning  
Walk around town, let my feet sink in it with you  
That's all I wanna do

I've counted every highway line  
I've heard every billboard sign  
I swear I've been everywhere  
But I'm looking for a place that's mine  
It's hard to put your boots in the ground  
For guys like me running town to town  
Somebody like you makes me want to  
Slow down, down, down  
Oh yeah

Maybe just drip like honey  
Maybe just sit like sand  
Maybe just stay right here  
Maybe just be your man

I've counted every highway line  
I've heard every billboard sign  
I swear I've been everywhere  
But I'm looking for a place that's mine  
It's hard to put your boots in the ground  
For guys like me running town to town  
Somebody like you makes me want to  
Slow down, down, down  
You make me wanna slow down, down, down
