

# One Good Night Deserves Another

Steve Wariner

Here I'm standing at your door  
I can tell by the moon it's going on four  
And a kiss is coming on baby  
Let's make this kiss last just long enough  
For the sun to come up and the stars to go out, one by one  
I'm not leaving till I hear you say

One good night doesn't mean it's over  
One good night deserves another

How can we call it a night  
When the night is saying it's love  
Tomorrow let's stop here just long enough  
And let our hearts run away with us

How can we call it a night  
When the night is saying it's love  
Tomorrow let's stop here just long enough  
And let our hearts run away with us

I want your slow loving, slow is nice  
Give me a touch and take me all night  
I know I'm gonna need it  
There's no need to hold back the heat in our hearts  
Light every star in the sky if we're good to ourselves  
We'll add another night to the fire

One good night doesn't mean it's over  
One good night deserves another  
One good night doesn't mean it's over  
One good night deserves another

One good night deserves another  
One good night deserves another
