

## When I Still Mattered to You

Steve Wariner

We were so young crazy and free  
The universe was ours we had it all you and me  
And our favorite place of all was in each others arms  
Yeah those were the days when you were my girl  
The love of my life you were my whole world  
That was when I still mattered to you

But somebody else matters to you now  
Maybe I can't have you but I still need you anyhow  
And all I have left are these memories of love we once knew  
When I still mattered to you

What we had together I thought it was real  
Now this broken heart of mine it just won't heal  
And you've moved on with your new life wish I could too  
I remember when you knew that you still mattered to me  
You said you'd stay here where you still ought to be  
That was when I still mattered to you

But somebody else matters to you now  
Maybe I can't have you but I still need you anyhow  
And all I have left are these memories of love we once knew  
When I still mattered to you
