

Cardio

Steven Malcolm

Cover my body in water
Drip all the way to the coast
We came from south of the border
I was baptized in the smoke
I got that fye on me
Light up the way that we on
Demons keep sliding on me
But I ain't sellin my soul
Got'a

Move, shakin, through the, pressure, like I'm Walter P
Can't stop it, if you wanted, got that favor on me
All the oppas tryna block it but it's prophecy
Watch it align, I heard him say that it's mine

Been runnin this thang like cardio
Puttin miles on the Yeezys
See the whole city from the patio
Think they never believe me
Looking at the game like Adios
Diving in screaming Geronimo
I really feel like I'm Pablo

Collecting the dirt on my cleats
Call me the bully I came in the playground
And took all they lunch ain't nobody gone eat
Humble the way that we moving
We never say much but the music be loving to speak
Been put the game in a figure 4
Off in a different mode
And we ain't letting it breathe
Hop in the game and go
Michael Jeffery Jordan 91-93
Shining the whole city see me
I remember days they didn't believe me
Nowadays they paying extra to meet me
Woah
Turn ya speakers up till neighbors call police
System never has been able to hold me
Ain't no way the industry could control me

Cover my body in water
Drip all the way to the coast
We came from south of the border
I was baptized in the smoke
I got that fye on me

Been rockin all designer
Prada me and I been feeling so Gucci
Caught me a wave now my life is a movie
Swim wit the sharks and see nothing that's new to me
Carry my name like it's all up to me
You see the wear n the tear on my feet
Valleys I walked and the demons I seen
Started wit many a lot of 'em flee
What you expect when it's greatness you seek
What you expect when you listen to me
Ain't about Dracos or poppin them tags
Only truth when I open my mouth and I speak
Solid foundation the brand concrete
Up on Rushmore while they Chizzle my cheek
Calling me ruthless it's too easy E
Making a statement while playing the background my life is a BGV

Cover my body in water
