

For you

If you dare to leave me, make you move
The passion is something I could use
But to every heart there is a way
Given a chance I know you'll stay
Something inside has possessed me
I won't let it be just a fantasy
What will it take to show you
And what can I say or do

For you

I would do anything for you
Give me a chance to be with you
Tell me what you want
And I can be dedicated
You don't know how long I've waited for you

Someone special has come my way and she's you
Girl you stole my heart, you know it too

You won't have no regrets if you come with me
'Cause there is oh so much to see
Something inside has possessed me
I won't let it be just a fantasy
What will it take to show you
And what can I say or do

Tell me what you want

For you, I would do anything, do anything

Girl, give me a chance of a lifetime

I promise you I won't be unkind
Just what will it take, just for me to show you
And what can I say or do for you, for you

For you, for you

Tell me what you want

For you
