

Mind Block

Stick Figure

Open up your windows, open up your eyes
Can you tell which way the wind blows?
Read between the lines
I know you're not perfect and no no, not am I
Music playing on your stereo to ease your mind
I've been working, I've working all long
Trying to find the melody I'm singing in this song
Words come and then again they're gone
Feels like I got a mind block

Open up your windows, open up your eyes
Can you tell which way the wind blows?
Read between the lines
The mind stop moving, it works just fine
Reggae music on the radio
Keeping the vibes alive

Open up your mind find that spark inside
Time to focus, realize good things take their time
Suddenly a glimmer of a light shines bright
Possessing me with all of which I need to speak my mind, whoa
Ask me will I stop? No way
Does your energy just drop? No not today
Ask me will I stop? We keep it rocking always
Let it all soak in

I've been working, I've been working all night long
Trying to find a spark or find out what i'm doing wrong
No problem I got time to focus on
I got some passion and more patience than I thought
Will I stop? no way
Does your energy just drop? No not today
Ask me, will I stop? We keep it rocking always
Let it all soak in

I've found a simple solution
I'm bound for places in choosing
Quiet down, got to get up keep moving
Let it all soak in

There's a world I don't know
Trying to find a place that I can go
There's a world I don't know
Trying to find a space that I control
Ask me will I stop? No way
Does your energy just drop? No not today
Ask me will I stop? We keep it rocking always
Let it all soak in
Ask me will I stop?
Ask me will I stop
