

Showdown

Stick Figure

The world's a dream, you said to me
The world's a dream, you said to me

It's gonna be a showdown, don't look the other way
Come a little closer, let's set the record straight
Bring your ammunition, however you choose it
When the pressure burns hot, this fire gone blaze

Some days this all feels hopeless
Never lose sight, never lose focus
I wonder why sometimes and still I know you know I know this
Feels like I found my calling
You're right back where you started
You ain't got much but what you got you've got to put it all in

The world's a dream, you said to me
An endless sea, we're forever free
The world's a dream, you said to me
All we need's a little focus

Rolling with Stick Figure when the pressure gets hot
Your finger on the trigger when you hear the gunshots
There's trouble and there's struggle and the hustle don't stop
We are the power of the sun

It's gonna be a showdown, don't look the other way
Come a little closer, let's set the record straight
Bring your ammunition, however you choose it
When the pressure burns hot, this fire gone blaze

I'm on my way and when I make it
You know the place in the world where the sound come from
Right where I wanna be when I wake up
Vibes and the high grade abun
I'm on a level but at the end of the day
With your badness talk, in your bad mind way
In this showdown mi see it, see them running away
Just talk straight if you have something fi say

The world's a dream, you said to me
When you smoke with we, the herbs are free
So just check the scene, so sweet and green
World on fire, mi are the gasoline

It's gonna be a showdown, don't look the other way
Come a little closer, let's set the record straight
Bring your ammunition, however you choose it
When the pressure burns hot, this fire gone blaze

It's all coming down to the wire
Some say where there's smoke there's fire
In life we all get high, and still I find we must get higher
Feels like two worlds collide
Know where to run, know where to hide
Can't stop the fussing and fighting
Wronger than right, where there's thunder there's lightening

The world's a dream, you said to me
An endless sea, we're forever free
The world's a dream, you said to me
All we need's a little focus

Rolling with Stick Figure when the pressure gets hot
Your finger on the trigger when you hear the gunshots
This trouble and the struggle and the hustle don't stop
We are the power of the sun

It's gonna be a showdown
It's gonna be a showdown, showdown
It's gonna be a showdown
We are the power of the sun

It's gonna be a showdown, don't look the other way
Come a little closer, let's set the record straight
Bring your ammunition, however you choose it
When the pressure burns hot, this fire gone blaze

It's gonna be a showdown, don't look the other way
Come a little closer, let's set the record straight
Bring your ammunition, however you choose it
When the pressure burns hot, this fire gone blaze
