

Skull and tones trickle through my bones
As I drink my whiskey and I get a little stoned
Merry go round until I get back home
Falling through a ghost world
Chitty bang roasted
We echo through the sky like a unicorn
Your mind ain't dead you were always unborn
Memory torn wobbly roller coaster
Take me to the place that proceeds with the most

I was taken away by grooves you made me find my way
Didn't wanna run around town causing a ruckus
And getting drunk everyday

Take me to the place La Fiesta friend
Don't leave me here where this town don't end
Steel fist to the wrist band soldier
Take me too a moon where the sun don't shine no more
Creamy crusty pawn shop I sell my guitars
Cuz where I'm going won't need them no more
Hell on earth through my eyes I'm feeling
Trippy mystic motion in a hot tub screaming
Scrawny skeleton are you breathing?
Take me to the place that proceeds with the most

Take me to the place La Fiesta friend
Don't leave me here where this town don't end
Recoil stays vibration across the nation
Ripple effect and double dissect I look a little closer
If you wanna step don't step to close
Cuz my brudda knows a brudda who proceeds with the most
Smiling clown looking at you with a machete
Waiting for his moment to turn you into spaghetti
He comes a little bit closer
Better watch out he's a killer clown

I was taken away by grooves you made me find my way
Didn't wanna run around town causing a ruckus
And getting drunk everyday
Take me to the place La Fiesta friend
Don't leave me here where this town don't end
On a flight path I take off
Living in a Dreamland
We'll never be lost
