

# Sleep Alone

## Sticky Fingers

In all this catastrophe (Got lost in the shade)  
And you might've loved me alive  
I'm out of your world tonight (I'm lettin' you go)  
I'll give it another chance 'cause I don't wanna be alone

Bright skin, cinnamon  
Chiller boy, make her grin  
My medicine, a peace cloud  
This sinner girl, she funny  
Face down, we're crushin' now  
Her taste, her deal, I'm fadin' now  
Floatin' through phenomenon  
We sleep alone

Why'd you run away for?  
Fuck it what they say  
'Cause I don't wanna break up  
I made a mess, I changed  
So I scribble somethin' down from the top of my head  
'Cause this chiller boy won't feel no pain  
I smoked my last cigarette, my tongue turned burnt  
Like the smoke flowed OLA

Push me, I won't push you back  
But don't front me like a punchin' bag  
I'm sorted, I'm a clown, no sad  
I take another one  
Got cornered in your cul-de-sac  
And there's no promises I'm comin' back  
And there's no wonder that I feel so bad  
I take another one

Bright skin, sinner man  
Chiller boy, make her grin  
My menace in a beach-clad  
Sinner girl, she funny  
Bathe now, we question now  
We taste a deal, I'm fadin' now  
Flowin' through phenomenon, we sleep alone

Why'd you run away for?  
Fuck it what they say  
'Cause I don't wanna break up  
I made a mess, I changed  
So I scream this song down from the top of my head  
'Cause it's chiller but I feel no pain  
I smoked my last cigarette, my tongue turned bright  
Like the smoke flowed OLA

In all this catastrophe, got lost in the shade  
And you might've loved me alive  
I'm out of your world tonight, I'm lettin' you go  
I'll give it another chance 'cause I don't wanna be alone

And even when I stoop that low (Give up, let go)  
'Cause still every time, I seen that face

In all this catastrophe  
(Can't sleep a night alone, can't sleep a night)  
In all this catastrophe  
(Can't sleep a night alone, can't sleep a night)  
In all this catastrophe  
(Can't sleep a night alone, can't sleep a night)  
In all this catastrophe, got lost in the shade
