

Lucy

Still Woozy

Are you for the whole last week?
Huffin', laughin', cussin' and yelling in your sleep? (Why?)
I think you're through
What the hell you watching, boo?
Is there something supernatural fucking with you? (Really though)

Well I know that it's only time
But let me see, what's on your mind?
I could see, what's on your mind?
What's on your mind?
Why are you so damn cute?
Make a fool of me, I won't die
Why?
What's on your mind? What's on your mind?

Safe is your heart, lover
You know we should start
Learn to be open (Be open)
Safe is your heart, lover
Safe is your love
You know we should start
Learn to be open (Be open)

She could paint the sky like a photo, yeah
And baby we should never know it
If we don't, if we won't try
We could live a life full of color
If you want (If you want)
Let me know
We'll escape the pigeon hole (pigeon hole)
It's our world, so go girl
Let's get it on

Well I know that it's only time
But let me see, what's on your mind?
I could see, what's on your mind?
What's on your mind?
Why are you so damn cute?
Make a fool of me, I won't die
Why?
What's on your mind? What's on your mind?
