

Rush

Stokley

Baby, I've been wondering
If you're superhuman
I can feel your energy from here
I ain't here for nothing
So, baby, show me something
You know how to change the atmosphere

Good, feels good
Good, so good
Good, feels good
So good, so good

I know we're getting closer
When you take me up
We're getting to the best part
I can feel it when you feel the rush
(Rush, rush, rush)
And when we come together
Oh, we make a mess
No point in being silent
Let it go when you feel the rush
(Rush, rush, rush)

Your touch, your smell
The way it feels this time
Ooh, I can't get it off my mind
I don't mind, I don't mind
I can't take it, got me chasing all day
But I don't care, it feels right
Ooh, yeah, yeah

Good, feels good
Good, so good
Good, feels good
So good, so good

I know we're getting closer
When you take me up
We're getting to the best part
I can feel it when you feel the rush
(Rush, rush, rush)
And when we come together
Oh, we make a mess
No point in being silent
Let it go when you feel the rush
(Rush, rush, rush)

It's more than just the physical
Leave me so emotional
I ain't never getting tired
You got me needing you every night
Baby, I might sound crazy
I might be out of my mind

Let it go, let it rush, let it flow

I know we're getting closer

When you take me up
We're getting to the best part
I can feel it when you feel the rush
(Rush, rush, rush)
And when we come together
Oh, we make a mess
No point in being silent
Let it go when you feel the rush
(Rush, rush, rush)
