

I Believe

Stone Broken

Get home, music on, a million miles away
I sit down and play around, I've practiced every day
Rewind every time and do it all again
Hoping someday that I'll be just like them

I've got a feeling you're gonna get the best of me
You've gotta see it and start believing
Honestly you can be anything you want to be
I've gotta feeling you're gonna have the time of your life

Time's gone moving on I guess I'm on my way
Ride along, singing songs, just to hit that stage
Lights down on the crowd, a voice inside my head
Hoping someday that I can do it again

I've got a feeling you're gonna get the best of me
You've gotta see it and start believing
Honestly you can be anything you want to be
I've gotta feeling you're gonna have the time of your life

Reaching out, I can see
I won't waste a second 'cause I want it all
Reaching out, I believe

I believe, I believe
There's no other way

I've got a feeling you're gonna get the best of me
You've gotta see it and start believing
Honestly you can be anything you want to be
I've gotta feeling you're gonna have the time of your life
