

Remedy

Stone Broken

There's a fear within me, under my skin
When I pray for mercy, it pulls me in
Like a chemical, it's fueling my anxiety
Finding pieces from the broken mess inside of me

Undermined
A thousand times
By the parasite
That's in my mind

And there's no way that I can breathe
And it's suffocating me
I was isolated and contaminated
This could be the end of me
'Cause I need a remedy
I need a remedy

I've been waiting so long to find my way
Tryna right all my wrongs and my mistakes
I've been hiding on the edge of insecurity
But the voices in my head were just imaginary

Undermined
A thousand times
By the parasite
That's in my mind

And there's no way that I can breathe
And it's suffocating me
I was isolated and contaminated
This could be the end of me
'Cause I need a remedy
I need a remedy
A remedy

When I'm lost and self-loathing [?]
An impostor breaks through, oh let me breathe
If the heart that I'm wearing comes undone
It'll be the pain I bear that carries on
And on, and on, and on

And there's no way that I can breathe
And it's suffocating me
I was isolated and contaminated
This could be the end of me
And there's no more I can bleed
'Cause I need a remedy
