

Stay All Night

Stone Broken

I was taking a slow ride, trying to stay awake
I was taking everything I had and I, I slipping away
Didn't know what was in my head, and I didn't wanna say
I need change, I need change
All in time

Now I know the world is mine
And it makes all this, feel right
I just want to stay all night

I was making my own life, I was breaking free
Used to think that I was paying my way but, but that wasn't me
I was thinking of a million things but, in a different way
I need change, I need change

All in time, now I know the world is mine
And it makes all this, feel right
I just stay to stay all night

I will give it all, I'll take control
But I won't follow
I won't give it up, I've had enough
No pride to swallow

All in time, now I know the world is mine
And it makes all this, feel right
I just want to stay all night
I just want to stay all night
