

Worth Fighting For

Stone Broken

Head down, jury's out, got some things to think about
Not pointing fingers but it's easy to see
Messed up, out of luck, this is gonna show you up
Communicating your infectious disease
Cut ties, dirty lies, you're the first to criticize
Because you're full of it and everyone knows
Deadbeat, enemy, everything you're covering
Under the weight the cracks are starting to show

Stand up, show them what we're made of
That's what we're fighting for
Don't wanna lose it all
Stand up, lead a generation
That's what we're fighting for
They're gonna give it all
Stand up, the world is worth fighting for

Big screen, magazine, show us what you're offering
You realize it's all just part of the show
Rules bent, money spent, wonder where the budget went
That's not the kinda thing they like to expose
Wake up, take a look, haven't they all got enough
We can't relate 'cause it's the life that they chose
Red face, open case, disappeared without a trace
Why can't you see that's how democracy goes

Stand up, show them what we're made of
That's what we're fighting for
Don't wanna lose it all
Stand up, lead a generation
That's what we're fighting for
They're gonna give it all
Stand up, the world is worth fighting for

Stand up, show them what we're made of
That's what we're fighting for
Don't wanna lose it all
Stand up, lead a generation
That's what we're fighting for
They're gonna give it all
Stand up, the world is worth fighting for
