

## Distant Light

Stoned Jesus

Night takes me for the ride  
Hide let us stay inside  
Slide pretend that we're not here

Gone too far out of sight  
Now there's only a distant light

Swim through celestial sea  
Pulled out from under me  
Dims everything I see  
What will I do without you?

So how could I go on?  
Or is it darkness before the dawn  
Gone into the endless night  
Now it's only the distant light
