

Not One Moment

Stoney LaRue

I wake up to a new world every day
Face the fight, trying to find my way
Sun goes down, I leave all my cares behind
There's not one moment you're not on my mind

The ways of this world never seem to change
All we can do is turn another page
And no matter what joy and tears that I find
There's not one moment you're not on my mind

To be with you, it's all I want to do
To know your love is all I dream of

To be with you, it's all I want to do
To know your love is all I dream of

We are only prisoners of time
Amazed at how fast it slips on by
Days roll on and years are close behind
There's not one moment you're not on my mind
Yeah, there's not one moment you're not on my mind
