

Welcome to my new spacestation
Stay as long as you like, it's a sad vocation
And you leave me standing on top, of the earth
I realize it just won't work
And you leave me standing out in the cold
Telling everybody that I just don't know

You wait just a little, wait just a little
You wait just a little too long

You wait just a little, wait just a little
You wait just a little too long

Why you gonna leave me stranded up here?
Why you gonna leave me stranded up here?
Why you gonna leave me stranded up here?

When the sunlight gets chased away
The sunlight gets chased away
The sunlight gets chased away

Welcome to my next, big decision
Welcome to my next, big decision
Welcome to my next, big decision
