

## Don't Bring Harry

### The Strangers

Harry and me we live in a dream  
With a friend like him I don't need enemies  
I don't know where morning is  
It might not come today  
That's the trouble when Harry's around  
He forces me to play

I should have refused to meet this midnight cheat  
He likes to prey on my mind with his own special treat  
I don't know where morning comes  
It might not come today  
Harry likes to play all night  
I'll do what harry says

Don't bring harry  
I don't need him around  
Don't bring harry  
I don't need him around

Ah... you've met harry  
I can see by your eyes  
If once there was life there  
Now there's compromise

Harry is a beast of luxury  
He just wants my body and soul leaves the bones behind

Ah... you've met harry  
I can see by your eyes  
If once there was action  
Now there is no life

Don't bring harry  
I don't need him around  
Don't bring harry  
I don't need him around
