

## Down

## The Strangers

Here we are again  
Celebrating what we had  
When times were bad we knew  
We wouldn't always be so sad  
Like the sun coming out  
From behind the clouds  
You appeared and never let me down

Down, down  
I've been so down  
Down, down  
But you came along and blew away the clouds

We have drunk from this cup  
So many times before  
And it always tasted sweet  
I always wanted more  
Let us leave the bitter taste  
To those whose hearts are cruel  
Until I met you I always

Down, down  
I've been so down  
Down, down  
But you came along and blew away the clouds
