

## Giants

### The Stranglers

Once there were giants walking amongst us  
Now I have to deal with little men with little hearts  
I'm glad my father's not here to see  
What happened to men like him  
They fought the battles these dwarves can only talk about

Times have been better but littleness won't invade my soul  
One word from you and you will make my life whole  
I stopped the demons at my door  
I lost respect for so called laws  
And the lawmakers all exposed themselves as fool

The whole world was smaller then, shrinking so it seems  
The giants you've read about are lost to your dreams

I am just a simple man and I need love to survive  
I would be happy If there was a sense to my life  
I've come to value man as good as their world  
I've learned to laugh at what is absurd  
I'm beware of man what they move in herds

The whole world was smaller then, shrinking so it seems  
The giants you've read about are lost to your dreams  
The Earth was a growing place, turning with the sun  
And giants you've heard about are gone, all gone
