

Heroes

Stratovarius

What does it take
To be fearless, bold and brave?
Risk your life to make
This modern world a better place
All the pain
That your tired eyes have seen
Made you stronger
Now you're spitting danger in the face

You hold your head up high
You won't give up the fight
You leap into the flame

Our heroes of the night
You guide us out of the dark
You are the light
A flame so bright
Our heroes of the night
You guide us out of the dark
You are the light
A flame so bright
Our heroes of the night

How do you feel
When you carry all the weight?
How do you heal
And find the inner strength to face the day?
Soldier on
When the world is crashing down
For so long you've hid your sorrow deep
And led the way

You hold your head up high
You won't give up the fight
You leap into the flame

Our heroes of the night
You guide us out of the dark
You are the light
A flame so bright
Our heroes of the night
You guide us out of the dark
You are the light
A flame so bright
Our heroes of the night

You are the light
You won't give up the fight
A flame so bright
Our heroes of the night

Our heroes of the night
You guide us out of the dark
You are the light
A flame so bright
Our heroes of the night
You guide us out of the dark

You are the light
A flame so bright
Our heroes of the night
You are the light
You won't give up the fight
A flame so bright
Our heroes of the night
You are the light
You won't give up the fight
A flame so bright
Our heroes of the night
