

# Oblivion

Stratovarius

I've locked myself in silence  
And kept denying  
That you're already gone

Isolated in the darkness for too long  
I'm still holding you before  
You fade into oblivion

I can't save you  
In the end we fall apart  
Forgive me now  
No matter how  
Hard I try, you'll carry on  
Please be waiting  
We'll meet again beyond the stars  
I'm not afraid  
To embrace the end  
Time has come to let you go  
(To oblivion)

I'm tired to fight this sadness on my own  
I have waited way too long  
To stand up and move on  
Your decaying echo haunts me all the time  
I'm afraid to say the last goodbyes  
'Cause you will be forever gone (to oblivion)

I can't save you  
In the end we fall apart  
Forgive me now  
No matter how  
Hard I try, you'll carry on  
Please be waiting  
We'll meet again beyond the stars  
I'm not afraid  
To embrace the end  
Time has come to let you go

And leave our world behind  
I still believe  
You're within me  
In memories  
You'll be shining like a star  
And lightning up the skies  
I still believe  
You're within me  
In memories  
'Cause you were my only one

I can't save you  
In the end we fall apart  
Forgive me now  
No matter how  
Hard I try, you'll carry on  
Please be waiting  
We'll meet again beyond the stars  
I'm not afraid

To face the end  
Time has come to let you go

Now it's time to let you go  
To oblivion

Now it's time to let you go  
To oblivion
