

World on Fire

Stratovarius

Our world is on fire

Don't you dare to close your eyes
It's time to realize
We lost the game and are to blame
Mankind will expire
Better start to think
Cause the ship's about to sink
The storm is here, the end is near
Our world is on fire

Everyday we saw the signs
Everyday we closed our eyes
Now we pay for every choice that we made
This is the moment that defines
Is all we ever leave behind
A world we betrayed

Our world is on fire
Destruction, now burning
Our world is on fire
Warning, now the heat is rising
There's no returning
Our world is on fire

We can turn this world around
We won't let them bring us down
Let's make a choice, to raise our voice
And take ourselves higher
We're right and they are wrong
They are weak and we are strong
And we will fight for what is right
Our world is on fire

Everyday we saw the signs
Everyday we closed our eyes
Now we pay for every choice that we made
This is the moment that defines
Is all we ever leave behind
A world we betrayed

Our world is on fire
Destruction, now burning
Our world is on fire
Warning, now the heat is rising
There's no returning
Our world is on fire
Warning

Our world is on fire
Destruction, now burning
Our world is on fire
Warning, now the heat is rising
There's no returning
Our world is on fire

Warning, destruction

Everything burning
Our world is on fire
Warning, now the heat is rising
There's no returning
Our world is on fire

Warning
Our world is on fire
Warning, now burning
Our world is on fire
Warning
Our world is on fire
