

# Sun Outside My Window

Strawberry Guy

I can feel a change coming again  
You tell me I'm wrong, is it all pretend?

But I see you there  
You're looking at me  
And I feel so free  
There's sun outside my window  
There's sun outside my window  
There's sun outside my window

I can sense a shift coming from you  
I guess I know you now, was it ever true?

But I see you now  
You're looking at me  
And I feel so free  
And there's sun outside my window  
There's sun outside my window  
There's sun outside my window

I want you evermore  
I want you evermore  
I want you evermore  
I need you evermore

But I see you there  
You're looking at me  
And I feel so free  
There's sun outside my window  
There's sun outside my window  
There's sun outside my window
