

## Actions Not Words

### Stray from the Path

The innocent are truly guilty  
Complacency is criminal, this shit is not subliminal  
The failures in your face when your eyes close  
All you know is tunnel vision, they don't go where the dark goes  
High horses, of course it's easy living where the grass grows  
Thoughts and prayers get us nowhere, so fuck what you heard  
Actions speak louder than words

How real is your real world?  
you get lost in it you fail victim to the cause of it  
How real is your real world?  
Two sides polarized social suicide  
How real is your real world?  
you get lost in it you fail victim to the cause of it  
How real is your real world?  
what's left for the rest of us?

I watched the earth burn slow  
I walked the ground where nothing grows  
Everything is nothing, nothings all they know  
Everyone should be your brother, but your care is a cover  
So, put the money where the mouth goes  
Thoughts and prayers get us nowhere  
Fuck what you heard  
Actions speak louder than words

How real is your real world?  
you get lost in it you fail victim to the cause of it  
How real is your real world?  
Two sides polarized social suicide  
How real is your real world?  
you get lost in it you fail victim to the cause of it  
How real is your real world?  
what's left for the rest of us?

when there's a knock on the door  
Will you answer or ignore?  
It starts with you & ends with more  
The choice is yours  
Change the world
