

# The First Will Be Last

## Stray from the Path

Listen  
Hollow words are hollow points  
Noise suppression  
You don't hear them bang in the night  
Apathy is your favorite weapon  
The color ran from your face  
As the blood left your body  
Do you know what you've done?  
Motherf\*cker, you should ask somebody

What goes around comes around  
When a hand reaches out, you don't reach back  
What goes around comes around  
The last will be first and the first will be last

The last, first  
The first, last  
The last, first  
The first, last

Look at you now  
Sound asleep in a belly of the beast  
Living lavish  
The streets run savage  
Can't smell the smoke in the breeze  
Back to reality  
Hold your apology  
Do you know what you've done?  
Motherf\*cker, you should ask somebody

What goes around comes around

When a hand reaches out, you don't reach back  
What goes around comes around  
The last will be first and the first will be last

What goes around comes around  
How could you see this shit and not react?  
What goes around comes around  
The last will be first and the first will be last  
Last

How could you see this shit, and not react?  
Let me show you suffering  
No coward is king  
Let me show you suffering  
No coward is king  
Let me show you suffering

What goes around comes around  
When a hand reaches out, you don't reach back  
What goes around comes around  
The last will be first and the first will be last  
The last will be first and the first will be last  
The last will be first and the first will be last
