

## Deep Dream

STRFKR

I saw your face in a dream  
I heard you whispering my name  
I thought it couldn't be real, though  
When everything before all looked the same

Who's watching me  
As I walk away to the other side

Lie down slow, let it overflow  
Open my eyes and I paint it gold  
I let it go, leaving all my love  
Walk through the door and I paint it gold

What isn't there that you need?  
Don't wanna do it on your own  
My thought's unfold like a movie  
While they're always playing the same song

Who's watching me  
As I walk away to the other side

Lie down slow, let it overflow  
Open my eyes and I paint it gold  
I let it go, leaving all my love  
Walk through the door and I paint it gold

Lie down slow, let it overflow  
Open my eyes and I paint it gold  
I let it go, leaving all my love  
Walk through the door and I paint it gold
