Manny's Song

Stroke 9

No it's not another day for me
It never is and never was
I can't explain the way I'm tingling on this one
Magnified by more than water, rushing

Heaven's singing like some laughter bursting
Leading some river to the ocean
Something bleeding, flowing, green like the forest
And all those beautiful mountains

You and I could watch the flowers grow forever
Letting the course of nature run
And why not girl as long as its you and me together
Spending those moments in the sun

You and I could watch the flowers grow forever
Letting the course of nature run
Why not girl as long as its you and me together
Spending those moments in the sun

I know it's not the only way for me
But I feel it is the right one
'Cause everything about your face just makes me smile
Overwhelmed by more than feelings

You and I could watch the flowers grow forever
Letting the course of nature run
And why not girl as long as its you and me together
Spending those moments in the sun

You and I could watch the flowers grow forever
Letting the course of nature run
And why not girl as long as its you and me together
Spending those moments in the sun
Spending those moments in the sun
Spending those moments in the sun
