The Plan

Stroke 9

Tonight, we're gonna take the town, down
Tomorrow, we're gonna regret what we did
But not right now, and not out loud

I've been workin' on a plan
To become a better man
It's gonna take me turnin' round
Everything I've learned up until now

We know time is up
We know what is wrong
We know what is strong
And the difference has to come from us

Tomorrow, we won't forget what was done
And it won't be gone, but you push us on

I've been workin' on a plan
To become a better man
It's gonna take me turnin' round
Everything I've learned up until now

We know time is up
We know what is wrong
We know what is strong
And the difference has to come from us

We've waited till now
All these changes takin' us way too long
We don't doubt
The courage it takes to admit your mistakes, and move on
No more
[?] that lead to excuses and outright lies
A reality that we all see
Who is that person? I know that it's not me
Let's go now
We've needed this for so long

I've been workin' on a plan
To become a better man
It's gonna take me turnin' round
Everything I've learned up until now

We know time is up
We know what is wrong
We know what is strong
And the difference has to come from us

We've waited till now
All these changes takin' us way too long
We don't doubt
The courage it takes to admit your mistakes, and move on
No more
[?] that lead to excuses and outright lies
A reality that we all see
Who is that person? I know that it's not me
Let's go now

We've needed this for so long
