Wild

Stroke 9

Summer sky with the rain falling down
And the look in your eye as we fall to the ground
The wind blows hard your brown hair everywhere
And I know you can feel me as I take you away

Wild
You drive me wild and it's no surprise
Wild
You drive me wild with that look in your eyes
Wild

Spinning and turning and feeling you burning
Knowing that the sky won't fall on us now
I can't see you can't hear you just feel you
It's a feeling that I'm never gonna get back on the ground

Wild
You drive me wild and it's no surprise
Wild
You drive me wild with that look in your eyes
Wild
You drive me wild and it's no surprise
Wild

Clouds above with the rain falling down
The sky's on fire in this small town
I love to watch the lights flicker on flicker off
Brings back memories of the years that I have lost

Wild
You drive me wild and it's no surprise
Wild
You drive me wild with that look in your eyes

Moving ahead well there's no turning back
I can tell by your hand that you fell the same
Can tell by your voice where you're calling my name
