

# Planet of Garbage

## Structures

We had it all, ruined the place we inhabit  
'Cause living out its fate wreaks havoc  
Now looking back I can tell why the ease would justify our mean  
s  
All we do is take what we're given and make no amends  
I can't seem to shake this old feeling  
I love when it ends  
All we do is take  
No matter what the outcome

Every step is pain  
Whether you're trying or not it's the fucking same thing  
Good intentions don't mean a thing  
If we want to make a change in the world, we need everyone

Did you think all of your problems were fixed?  
Well, not this one  
Crumbled to dust, pollute the earth to the crust  
We lost our chance to save our existence

I can't wait to see the fucking day that you wipe that look off  
your face  
'Cause then you'll realize we are out of space  
Planet of garbage  
Toxic waste
