

Black out the Sky

Strung Out

The blood in our veins
Holds the memory of who we used to be
In ritual, in sacrifice
Bleed it from ourselves and we set it free

Like dead angels falling out of the sky
Like the poison in my eye
The only thing I offer you

Free man, never stray far
His only light a dying star
Creation, navigation
You lost your pretty head to the flashing lights

Dream it, in opium
The sun burns all creation

And while the stars have all gone away
And all the ships have lost their way
Like the chemicals between me and you

So we blacked out all the sky
And we lost our only way
Chasing lights
Now all the machines watch us die
Like a glitch in the electric eye
Watching over you

And now our love is just a hole in the sky
From the sun we always knew would die
Black wings we made to fly

I can't tell if I'm getting through
Awaiting the end of you

So we blacked out all the sky
And we lost our only way
Chasing lights
Now all the machines watch us die
Like a glitch in the electric eye
Watching over you
Watching over you
Watching over you

The blood in our veins
Holds the memory of who we used to be
