

Disappearing City

Strung Out

Electro-
magnetic pulse and the glory of the darkness in your eyes
Tonight
The empire in shadow and disorder wait in silence without light
And time

And I here stand with you forever blue
We don't need their light to find the way we gotta go
We made our way through darker days
Like movements in a world without eyes

The streets are dark and history is lost
May the silence remind you of the cost
In witness the reckoning has washed the light away
Then you smile
And say

And here I stand with you forever blue
We don't need their light to find the way we gotta go
As we make our way
We lose our way
We been running blind
Like strangers passing in the night

I don't wanna go it all alone
Do I dare to walk with you
Do we dare to take what we cannot own
Never far away but distant
I don't wanna see this ending tonight
This empire will scream
