

## Future Ghosts

### Strung Out

Get on your knees, cross yourself for the war  
And whisper to me you don't love me anymore  
Bring out your dead, I can feel the allure  
'Cause California's everybody's whore  
Wash it all away

Let's go down like heroes  
Let's be dangerous with our love  
We're never coming back here again  
We're never gonna last  
We're never gettin' out alive  
'Cause the devil in me is the devil in you

Lights in the sky and another war  
And I'm here alone with the worst of you  
Satellites and information  
My heart receives a signal  
And it speaks to me  
In the hieroglyphics of the digital world

Let's go down like heroes  
Let's be dangerous with our love  
We're never coming back here again  
We're never gonna last  
We're never gettin' out alive

We are the spirit divided  
In a brave new world  
You see I'm reaching out here  
I'm reaching out for you

My eyes are bleeding digital blood  
From the images on my screen  
Telling me who to hate who to love  
And it wants everything  
We got dark ritual  
We got plastic in our veins  
We got love, love, love

Let's go down like heroes  
Let's be dangerous with our love  
We're never coming back here again  
We're never gonna last  
We're never gettin' out alive

All these signals bring me back to you  
We are the genesis of a brave new world
