

# Uncoil

## Strung Out

Slipping in and out of reason  
And I don't mind  
Side effects are expected  
With this experiment of mine  
I want to be reborn  
Breath smoke  
Think black and call it a night  
A temporary eclipse outshines me for a moment  
I see no end in sight now

And still I wait  
For this stranger inside of me  
To show himself and let me be

Slowly I increase the dosage  
One more try and I'll get it right now  
Feel my head expanding outward  
I've arrived at a place  
I haven't been before yeah

Something in the atmosphere  
Is speaking what I want to hear  
The walls have started breathing  
The colors I am seeing  
The sign ahead reads welcome neighbor  
Give up all your fears and enter  
Step on through no hesitation

No disguises  
My eyes are wide open  
And I can see for the first time  
How did we get this far down  
How do I find my way back  
From this head I've let uncoil

No disguises  
My eyes are wide open  
And I can see for the first time  
How did we get this far down  
How do I find my way back  
From this head I've let uncoil
