

How to Fly

Stryper

I've always looked at you
As a beautiful creation
I hope you know it's true
You're my dearest proclamation
I see your perfection
And I say well done forever
My love and affection
Is for you in my endeavor

What can I do to make you love me?
Give you the world with the stars and sky
What can I say to make all the pain go away
And show you how to fly

All that I've ever wanted
Is for you to live in happiness
With overflowing joy
In a constant state of simple bliss
You are the world to me
I would never jeopardize a thing
One day I know you'll see
That I'm offering you everything

What can I do to make you love me?
Give you the world with the stars and sky
What can I say to make all the pain go away
And show you how to fly

The sun shines down
It warms the heavens to the ground
But doubt spins round & round
You can't stop love
It flows forever from above
And frees you when you're bound

What can I do to make you love me?
Give you the world with the stars and sky
What can I say to make all the pain go away
And show you how to fly
What can I say to make all the pain go away
And show you how to fly
