

Go

Stuck Mojo

The time is now
The time has come
It's time to fight
No time to run
Charge into the night
The lines are drawn
Fight with all your might
Till life is gone
Sick of hearing
That you're always wrong
Time to figure out
What's going on
Peep the world
And all there is to see
Choose for you
And I will choose for me
Never let em kill your spirit bro
Scream it loud
So all can hear it yo
Go!
We're the future
Me and you
Those older folks
Don't think we have a clue
They say we're lost
And slipping fast
And my response is
Kiss our ass
Mosh like you've never moshed before
Move no parking
Out on the floor
One life to live
So live it well
Strive for success
No time to fail
If you should fall
Then rise again
Call on your pride
From deep within
Don't let no one
Hold you back my friend
Rock N Roll
until you meet your end
Go!
We're the future
Respect the past
The present's a gift
We should open fast
Enjoy your life
No questions asked
Cause theirs no telling
How long you're life will last
Who we are
Is not always our perception
An illusion that some of us
Will take to the grave
Do you know

You'll be eulogized at your funeral
It's not too late
To change your way
We are the future
Me and you
Those older folks
Don't think we have a clue
This is our time
This is our fight
This is our struggle
Our chance to get it right
