Right out the night, we're taking the fight From now on we'll go our way Glory we'll find, leave sadness behind For reborn we are today

You're gonna see that it's over, we'll never give it up

refrain:

We come alive Never falter, never fail We come alive Turn and run now when we come alive

Right out the black, we'll win your attack And freedom shall be eternal Forever again our power will win And yours lies won't be heard of

You're gonna see that it's over, we'll never give it up

We come alive
Never falter, never fail
We come alive
Run away and turn your tail
refrain

We come alive

You're gonna see that it's over, we'll never give it up refrain
